Strength and Balance Retraining Exercises

Introduction

Before you start these exercises make sure you have a suitable and safe environment. Ensure the support you use is strong and stable such as heavy furniture or a kitchen work-top.

Wear comfortable clothes and supportive footwear.

Undertake ONLY the exercises that have been taught to you by your physiotherapist.

Whilst exercising if you experience any chest pain, dizziness or severe shortness of breath stop immediately and contact your GP.

If you have not exercised for a while you may experience some minor muscle aches. This is common, tell your therapist when you next see them.

If any of your exercises involve the use of ankle cuff weights please read the instruction sheet provided by your therapist.
