

Neurophysiology

Having a MSLT

appointment

You are coming to hospital for a MSLT. This records your brain waves, eye movements, heartbeat, and muscle movement. This helps the doctors to work out how to look after you.

You will be here all day from approximately 08:45 until 16:30.

Please bring music/laptop/books with you.

We will clean small areas of your body then fix some silver discs with stickers and paste. This will not hurt.

We will join the stickers to the EEG machine with wires. This will not hurt.

z z z z z	You will be asked to lie down and try to sleep 4-5 times during the day for 20-35 minutes at a time.
	We will also make a video of you. This will show us if you move around in bed.
wetwipe	When the test is finished, we will take off the stickers and wipe your body again.
home	If you are not having any other tests, you can go home.
any questions	Please ask us if you have any questions.
