

Breast Clinic Outpatient Department

Welcome to Breast Clinic

Whilst in Breast Clinic today you will be seen by a member of our Surgical Breast Team. The Surgical Breast team is made up of the Consultant Surgeons, a Nurse Consultant, Associate Specialist Doctors, Registrars and Advanced Nurse Practitioners.

Your initial meeting with a member of the team will include the taking of a history of your condition and a clinical examination. Following this there will be a discussion of any clinical findings with yourself, and a recommendation of any further investigations should you require the same.

Routine investigations commonly recommended within the Breast Clinic include mammograms and / or ultrasound scan. You will be given a leaflet when you first arrive in Breast Clinic explaining the most common procedures undertaken.

The majority of patients seen in Breast Clinic today will be seen twice; once for their initial assessment and the second time for either a further investigation or the results of their imaging. This can sometimes cause delays in Breast Clinic and we appreciate your patience in this matter.

Also in Breast Clinic today, there will be a member of the Breast Care Nursing Team. Should you have any questions regarding any aspect of your treatment that you do not understand or may have forgotten to ask, they will endeavour to answer these for you. A member of staff will locate the Breast Care Nurse for you should you wish to see them.

Please do not leave the department or hospital if you are concerned or worried over any aspect of your care or treatment in Breast Clinic today.

Thank you
