What to expect?

There may be times when you are only required to see one healthcare professional. There may be times when you are required to see several healthcare professionals in one clinic appointment. Therefore you may be asked to return to the waiting area in between different reviews. Regardless, it will still be just one appointment time given to you. Although this is likely to cause delay in being seen, we feel that this 'one-stop' appointment would be more convenient to have all the required checks on the same day. If you think you should be seeing a healthcare professional not specifically arranged on the day, please do not hesitate to ask about this.

Due to the multidisciplinary nature and complexity of this clinic, we have created a **'Before you leave checklist'**.

If relevant today:

- Have you seen an Obstetrician?
- Have you seen an Endocrinologist to review your Endocrine condition?
- Have you seen a Diabetes Consultant / Registrar or Diabetes Specialist Nurse to review your diabetes?
- If starting new insulin today, have you seen a Diabetes Specialist Nurse?

Women with Type 1 or Type 2 diabetes, BP and urine checks are required at every visit:

- Have you had your blood pressure checked?
- Have you had your urine tested? (please have a urine sample ready)

Follow up (where possible we try to join follow ups together, but it will depend on individual needs):

- Do you know when your next obstetric and / or scan is?
- Do you know when your next diabetes and / or endocrinology follow up is?

Women with diabetes, please remember to always bring your glucose diary book and meter, even if you think your appointment is only for an obstetric review

If you are not sure, please do ask.
