First Seizure Guidelines Advice To Patients/Carers

- You have had a seizure (fit). Many people have an isolated seizure at some time in their lives, but this does not mean that they have epilepsy. This is usually diagnosed after two or more sudden unprovoked seizures.
- A seizure can happen to anyone if the circumstances are appropriate. Research shows that 1 in 20 people will have a seizure at some time in their lives. Two thirds of these will never have another one.
- There may be a reason for the seizure e.g low blood sugar, an excessive intake of alcohol or substance abuse.
- The brain is the control centre of the body. It is made up of millions of neurons or brain cells, which are constantly transmitting and receiving messages enabling our bodies to work properly. If some of these brain cells malfunction for any reason the messages can become disorganised and a seizure may result.
- You may be referred to the Neurology department if the diagnosis is unclear. An appointment will be sent to you. Otherwise please contact your G.P so that he/she is aware of your seizures.
- You must stop driving and inform the DVLA in Swansea that you have had a seizure. The law requires you to do this. Your car insurance automatically becomes invalid!
- You will be advised as and when you can reapply for your license by your specialist and the DVLA.

What to do if another seizure occurs

- Clear a space around the person and ensure no injury has occurred.
- Put something soft under their head for protection.
- Once the seizure has ended, roll the person onto their side (the recovery position).
- Try to ensure they can breathe easily.
- Stay with them until they have fully recovered.

Usually a seizure will be over in a few minutes. Please dial 999 for an ambulance if it lasts more than 5 minutes or is followed by another seizure.

Home Safety Checklist following a seizure

Children

- Do you avoid carrying children if you are on your own?
- Do you change nappies on the floor?
- Do you always bath children when somebody else is at home with you?
- Do you have an alarm system if you should get into difficulties?

Bathroom and toilet

- Do you always let another person know you are taking a bath or a shower?
- Do you always limit the temperature of the water?
- Do you always use one third to half a full bath?
- Do you shower if in the house alone?
- Does the door open outwards to avoid been blocked if you should fall?
- Do you leave the bathroom door unlocked or use safety locks?

Kitchen

- Do you use a microwave instead of an oven?
- Do you use a cooker guard?
- Do you turn pan handles away from you and place pans at the rear of the hob?
- Do you take the plates to the pans when serving?
- Do you use oven chips (rather than the chip pan)?
- Do you use cordless kettles and irons?
- Do you use an electric hob (rather than gas)?
- Do you cover sharp edges?
- Do you use an alarm system that will alert others if you are in difficulties?
